**NON-IFRS FINANCIAL INFORMATION:**

To supplement Endava's Consolidated Statements of Comprehensive Income, Consolidated Balance Sheets and Consolidated Statements of Cash Flow presented in accordance with IFRS, the Company uses non-IFRS measures of certain components of financial performance. These measures include: revenue growth rate at constant currency, adjusted profit before tax, adjusted profit for the period, adjusted diluted EPS and free cash flow.

Revenue growth rate at constant currency is calculated by translating revenue from entities reporting in foreign currencies into British Pounds using the comparable foreign currency exchange rates from the prior period. For example, the average rates in effect for the fiscal quarter ended March 31, 2018 were used to convert revenue for the fiscal quarter ended March 31, 2019 and the revenue for the comparable prior period.

Adjusted profit before tax is defined as the Company's profit before tax adjusted to exclude the impact of share-based compensation expense, amortisation of acquired intangible assets, realized and unrealized foreign currency exchange gains and losses, initial public offering expenses incurred, Sarbanes-Oxley compliance readiness expenses, fair value movement of contingent consideration, secondary offering expenses incurred and stamp duty on transfer of shares (all of which are non-cash other than realized foreign currency exchange gains and losses, initial public offering expenses, Sarbanes-Oxley compliance readiness expenses,

secondary offering expenses incurred and stamp duty on transfer of shares). Adjusted PBT margin is adjusted profit before tax as a percentage of total revenue.

Adjusted profit for the period is defined as the Company's profit for the period adjusted to exclude the impact of share-based compensation expense, amortisation of acquired intangible assets, realized and unrealized foreign currency exchange gains and losses, initial public offering expenses incurred, Sarbanes-Oxley compliance readiness expenses, fair value movement of contingent consideration, secondary offering expenses incurred and stamp duty on transfer of shares (all of which are non-cash other than realized foreign currency exchange gains and losses, initial public offering expenses, Sarbanes-Oxley compliance readiness expenses, secondary offering expenses incurred and stamp duty on transfer of shares) together with the tax impact of these adjustments.

Adjusted diluted EPS is defined as the Company's profit for the period adjusted to exclude the impact of share-based compensation expense, amortisation of acquired intangible assets, realized and unrealized foreign currency exchange gains and losses, initial public offering expenses incurred, Sarbanes-Oxley compliance readiness expenses, fair value movement of contingent consideration, secondary offering expenses incurred and stamp duty on transfer of shares (all of which are non-cash other than realized foreign currency exchange gains and losses, initial public offering expenses, Sarbanes-Oxley compliance readiness expenses, secondary offering expenses incurred and stamp duty on transfer of shares), divided by weighted average number of shares outstanding - diluted.

Free cash flow is the Company's net cash from/(used in) operating activities, plus grants received, less net purchases of non-current assets (tangible and intangible).

In order for Endava's investors to be better able to compare its current period results with those of previous periods, the Company has shown a reconciliation of IFRS to non-IFRS financial measures. Management believes these measures help illustrate underlying trends in the Company's business and uses the measures to establish budgets and operational goals, communicated internally and externally, for managing the Company's business and evaluating its performance. Management also believes the presentation of its non-IFRS financial measures enhances an investor's overall understanding of the Company's historical financial performance. The presentation of the Company's non-IFRS financial measures is not meant to be considered

in isolation or as a substitute for the Company's financial results prepared in accordance with IFRS, and its non-IFRS measures may be different from non-IFRS measures used by other companies.
